Disclaimer - Please make sure you have read and understood this disclaimer

This page aims to increase awareness of the location of defibrillators in the Ilkley area. It is not designed as a first port of call in case of emergency.

Always dial 999 in an emergency. The ambulance service should have an accurate up-to-date list of defibrillator locations.

In using this website's data, the user must be aware that the presence of a location in the list

- Does not indicate an absolute right to use the AED
- Does not indicate the AED is available for use 24/7 except where stated.
- AEDs that are available 24/7 are externally located and registered with the Ambulance Service
- you may need to contact the Ambulance Service for a PIN to access these.
- Does not indicate the AED is in full working order
- Does not guarantee the location is geographically correct. You can help us by alerting us via e-mail so we can correct data.

This page is provided for general information only, and should not be used in preference to dialling 999.
